Additional Requirements for JMS

Signature Pad - Topaz T-LBK462-HSB-R SignatureGem LCD 1 x 5 (Backlit)

* In the event that you purchase any evidence bar coding or inventory equipment not listed above, particularly a different make or model, Southern Software may not be able to offer support with setup or troubleshooting of that equipment. Southern Software cannot guarantee that any other, untested barcode printer or scanner will work correctly with our software or with the operating systems on which our software runs. In addition, the Dolphin® 6100 evidence inventory scanner is the only evidence inventory scanner that will work with our software and it must be shipped to Southern Software before installation so we can set it up. To avoid any potential problems of this nature,
